CASCINA CAMPORA

Category: Canned food
business description:

Fruit and vegetables are transformed into sauces, preserves, patés and jams such as quince apples with Freisa and the "povron d'cravij", an autochthonous variety of sweet peppers in oil: all following the organic dictates. In the agriturismo, the Novara family breeds rabbits and poultry without neglecting wine: in 1827, the farmhouse accommodated San Giovanni Bosco, in these parts for the grape harvest.
